# STUDENT SOFTWARE DOWNLOAD & INSTALLATION GUIDE

ADOBE TOON BOOM UNITY MAYA

This document contains information on how to download and install software needed for the MAGIC program in order to ensure academic continuity as we transition to on-line classes.

Deadline to have technology and software set up at home is March 27th, 2020.

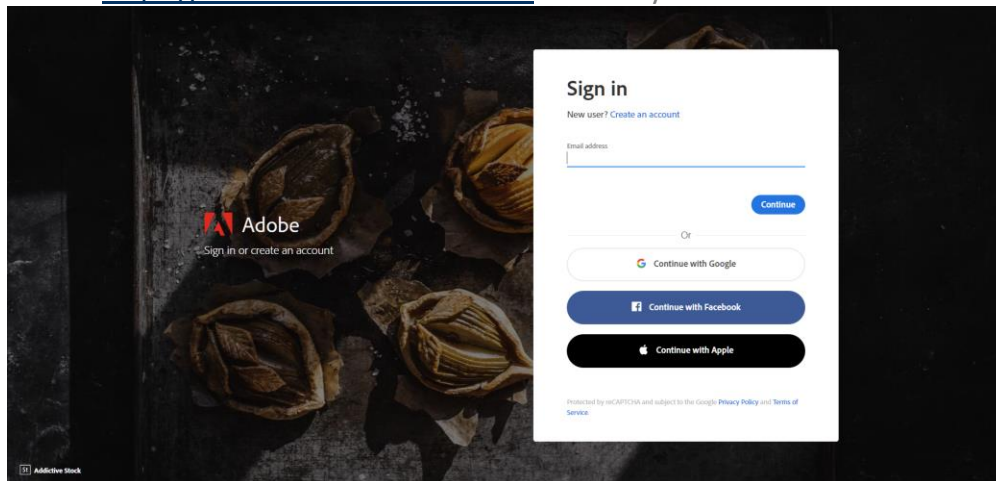

As a result of campus closure, student access to Adobe Creative Cloud in labs and classrooms is not available. Adobe has provided temporary at-home access for impacted students and faculty, so that they can continue their work remotely. Please follow the instructions below to enable access to Creative Cloud Desktop Apps on your personal device.

Step by step installation guide:

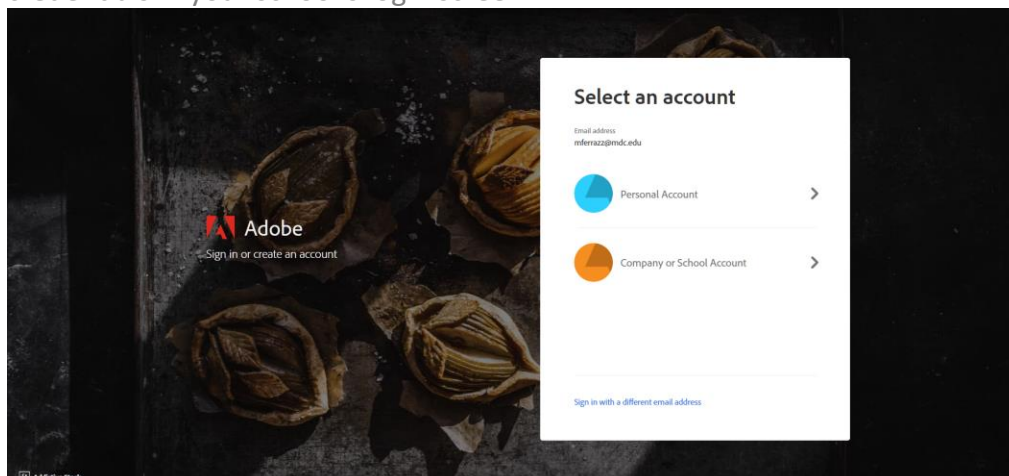

<https://faq.mdc.edu/knowledgebase/adobe-creative-cloud-desktops-step-by-step-installation-guide/>

## Instructions:

1. Visit <https://creativecloud.adobe.com> and use your school credentials to sign in.

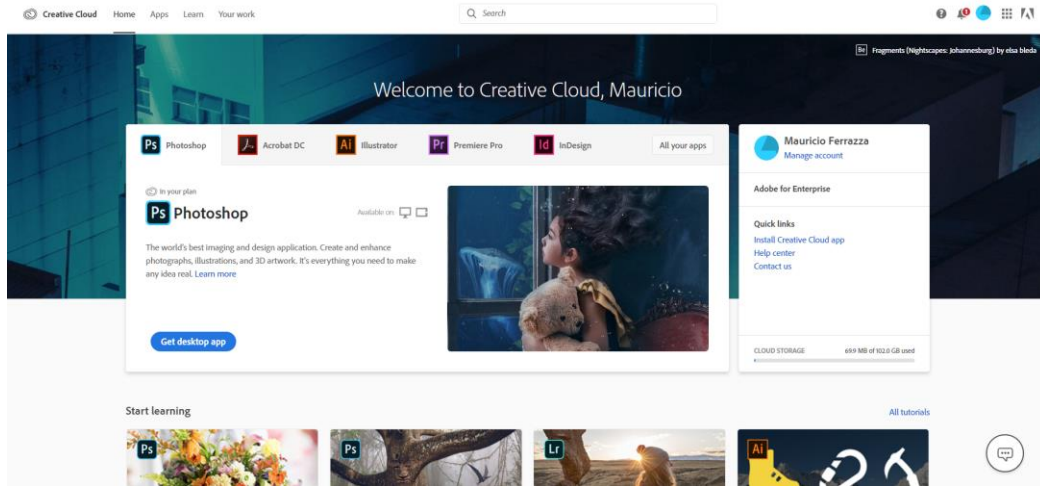

2. If prompted, select Company or School Account and then enter your password or provide your credentials in your school's login screen.

3. From the Creative Cloud website, browse for and download your desired app. Click Apps on the top of the page to view all apps.

For more information on how to download or install apps, see [Download and Install Creative Cloud apps](#).

For Higher Education students to continue developing skills, Adobe offers free “Daily Creative Challenges”. These are guided projects where participants receive creative prompts and connect with pros, mentors, and other students for feedback and support. Click on the app name to learn more: [Photoshop](#), [XD](#) and [Illustrator](#). Also, for inspiration and over-the-shoulder learning, watch pros share their creative process on Adobe Live daily at <https://www.behance.net/live>.

For faculty seeking to engage students during campus closures, Adobe has curated resources to help them discover inspiring projects, best practices, and new ideas so they can continue to drive valuable learning in virtual environments. ## Unity download archive

From this page you can download the previous versions of Unity for both Unity Personal and Pro (if you have a Pro license, enter in your key when prompted after installation). Please note that there is no backwards compatibility from Unity 5; projects made in 5.x will not open in 4.x. However, Unity 5.x will import and convert 4.x projects. We advise you to back up your project before converting and check the console log for any errors or warnings after importing.

**Long Term Support releases**  
The LTS stream is for users who wish to continue to develop and ship their games/content and stay on a stable version for an extended period.
